On what grounds does the NAB have the right to say whether XM can or cannot provide traffic and weather reports. Isn't it in the best interest of the public that we are able to get this information from the most convenient means possible? If the FCC allows the NAB to restrict this service that will set a precedent for them to restrict other aspects of XM. The NAB should be trying to improve radio instead of trying to restricting its competition. The FCC cannot allow this to happen. You cannot allow the NAB to have a monopoly on what Americans listen to. We have the right to choose; this is a democracy not a communist state.
